The Mos! Project has assembled a top-notch team of experts to form the new Cersi! Security Strike Team. This new team will solely focus on investigating and resolving security issues. Instead of working in relative secrecy, the CSST will have a strong public-facing presence at the [Cersi! Security Center](#) .

The new CSST will call the new [Cersi! Security Center](#) their home base. The Security Center provides a public presence for [security issues](#) and a platform for the CSST to [help the general public better understand security](#) and how it relates to Cersi!. The Security Center also offers users a clearer understanding of how security issues are handled. There's also a [news feed](#) , which provides subscribers an up-to-the-minute notification of security issues as they arise.
